Mr. Steven H Gunderson
Rocky Flats Cleanup Agreement Coordinator
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, CO 80222-1530

Dear Mr Gunderson

Please find attached a completed Rocky Flats Cleanup Agreement Standard Operating Protocol (RSOP) for Component Removal notification form for Buildings 881, 881F, 887, and Buildings 881 stacks S1, S2 and S3 component removal

In accordance with the Component Removal RSOP, this memorandum and its attachment are notification for RSOP implementation. This notification is for all activities required to bring Buildings 881, 881F, 887, and Building 881 stacks S1, S2 and S3 to the unrestricted release criteria with the exception of Resource Conservation and Recovery Act (RCRA) unit closure. The RSOP work under this notification will involve component removal, size reduction, and decontamination activities utilizing the methods specified in the RSOP. A decommissioning strategy for Building 881 was included in the Remediation, Industrial Decontamination and Decommissioning, and Site Services (RISS) Project Management Plan (PMP). Once the technical approach is received from the selected subcontractor, it will be compared to this strategy, a scoping meeting will be held with the Colorado Department of Public Health and Environment (CDPHE) to discuss the differences between the original strategy and the subcontractor's strategy.

Open or active RCRA units associated with these facilities will be closed in accordance with the RSOP, but notification requirements will be addressed under a separate notification. Also, once the pre-demolition is complete and the facility meets the unrestricted release criteria, an additional notification letter will be prepared to implement the RSOP for Facility Disposition.

The requirements, methods, controls and processes outlined in the RSOP have been included in the scope of work for the subcontract. If the subcontractor would like to use a method or process not included in the RSOP then the subcontractor is required to notify the prime contractor and an additional RSOP notification will be initiated and decision document modification pursued.

DEC 20 2001

The subcontractor will conduct work in accordance with his work control documentation. The exact methods and process selection will be communicated with CDPHE through an active consultation process including monthly RISS Production Meetings and weekly south side meetings. The building shell, including the floor, will not be breached during component removal activities.

As indicated in the RSOP, the Lead Regulatory Agency has 14 days to review the RSOP notification letter and provide feedback, including a definitive reason for not proceeding with the project. If no feedback is received within 14 days, the project will proceed as planned.

Questions can be directed to Steve Tower, Projects, Rocky Flats Field Office, at (303) 966-2133.
